

Errata

In the March 2001 issue of the *Journal*, in the article “Genetic and Mutational Analysis of a Large Multiethnic Bardet-Biedl Cohort Reveal a Minor Involvement of *BBS6* and Delineate the Critical Intervals of Other Loci,” by

Beales et al. (68:606–616), the affiliation of the fifth author, Nursel Elcioglu, was incorrect; the correct affiliation is Department of Pediatric Genetics, Marmara University Hospital, Istanbul. The authors regret this error.

In the July 2001 issue of the *Journal*, in the report “A Common Ancestral Origin of the Frequent and Widespread 2299delG *USH2A* Mutation,” by Dreyer et al. (69:228–234), the list of authors’ names should have included Cor W. R. J. Cremers and Xue-Zhong Liu. The correct-

ed list of the article’s authors is as follows: Bo Dreyer, Lisbeth Tranebjærg, Vigdis Brox, Thomas Rosenberg, Claes Möller, Magdalena Beneyto, Michael D. Weston, William J. Kimberling, Cor W. R. J. Cremers, Xue-Zhong Liu, and Øivind Nilssen. The authors regret this omission.

In the September 2001 issue, in the article “A Genome-wide Scan for Loci Predisposing to Type 2 Diabetes in a U.K. Population (The Diabetes UK Warren 2 Repository): Analysis of 573 Pedigrees Provides Independent Replication of a Susceptibility Locus on Chromosome 1q,” by Wiltshire et al. (69:553–569), the name of Gian Franco Bottazzo (affiliations: Department of Immunology, St. Bartholomew’s and the Royal London School

of Medicine & Dentistry, London; and Scientific Directorate, Ospedale Bambino Gesù, Scientific Institute [IRCCS], Rome) was mistakenly omitted from the list of authors. Also, the affiliation of the twentieth author, Richard Foxon, should have been Department of Immunology, St. Bartholomew’s and the Royal London School of Medicine & Dentistry, London. The authors regret these errors.

In this issue of the *Journal*, in the report titled “The Amyloid Precursor Protein Locus and Very-Late-Onset Alzheimer Disease,” by Olson et al. (69:895–899), there is an omission from the Acknowledgments section. The Acknowledgments should include the following sentence: “Genotypes were generated from biomaterial in the National Institute of Mental Health’s Alzheimer Dis-

ease Genetics Initiative, in the laboratories of Drs. Alison Goate (Department of Psychiatry, Washington University School of Medicine, St. Louis), John Hardy (Mayo Clinic, Jacksonville, FL), and Mike Owen (Department of Psychological Medicine, University of Wales, Cardiff).” The authors regret this omission.
